SUMMARY

Bruna de Carvalho Pinto received her B.S. degree in Biological Sciences from University of São Paulo (USP) in 2010. In 2014, she received her master's degree in Sustainability in Environmental Management from Federal University of São Carlos (UFSCar). She is also a geoprocessing (GIS) specialist and concluded a specialization course by PUC University in 2017.

She has more than eight years of experience in environmental legislation and GIS, including public and private institutions. She has worked as an environment analyst for a multinational company (Louis Dreyfus Commodities) in the sector of sugar and alcohol. She has worked also as a biologist for the Caraguatatuba's municipal government, involving environmental licensing proceedings and also the creation of protected areas by the federal environmental legislation. Since 2014, she has been working for environmental consulting firms assisting others to better understand and to enforce the complex Brazilian environmental legislation, with the aid of geotechnology and ESRI tools.

EDUCATION
